SUMMARY

I am a professional Mobile App developer with extensive experience in developing cross-platform applications using Flutter and Dart. I adopt the best coding practices to deliver high-quality solutions. My expertise includes integrating APIs, implementing real-time features, and optimizing user experiences. I take pride in successfully launching multiple applications and maintaining robust client relationships.

EXPERIENCE

05/2024 - Present

Flutter Engineer

Jumpspace pvt ltd

- Designed and developed cross-platform Flutter applications with responsive user interfaces using Dart.
- Integrated RESTful APIs using the Flutter HTTP, Dio package for optimized data retrieval.
- Enhanced user communication by integrating real-time chat and socket programming.
- Implemented secure authentication using Firebase, social platforms.
- Improved app functionality by integrating APIs, Google Maps, and third-party services.
- Managed app state efficiently with Getx.
- Integrated camera, networking and storage functionalities for enhanced user interactions.
- Expertise in Flutter's default navigation, Go Router & Get Router for seamless user flow.
- Boosted user engagement using push notifications.
- Executed secure payment processing with Stripe and in-app subscriptions with RevenueCat.
- Integrated Google & Apple Calendar for app scheduling functionality
- Successfully Developed real-time socket based games (TicTacToe, quiz games).
- Configured dynamic linking for seamless content access.
- Integrated Twilio for OTP-based user verification and authentication.
- Successfully Developed audio & video calling features using Zego cloud.
- Published over 3 apps on Play Store & App Store.

07/2022 - 05/2024

Flutter Engineer

Techlabs-cc

- Designed user interfaces for cross-platform Flutter apps, ensuring responsive designs across devices.
- Integrated RESTful APIs and Firebase Firestore for real-time chat and optimized data handling.
- Enhanced user communication by integrating real-time chat and socket programming.
- Implemented secure user authentication using Firebase and Amplify Cognito for identity verification.
- Integrated Google Maps SDK, enhancing app interactivity with dynamic maps.
- Expertise in Flutter's default navigation, Go Router.
- Managed app state using Bloc and Provider for efficient state handling.
- Integrated Stripe for secure payment processing.
- Published over 2 apps on Play Store and App Store.

EDUCATION

03/2024 - Present

Bachelor's in Software Engineering

Virtual University

01/2020 - 01/2022

Inter in Computer Science

Gulzar e Hijri Collage

CERTIFICATIONS

Certified Frontend & Mobile App Developer

Dhoraji Association IT Department

SKILLS

Flutter	Firebase	Socket IO / Web Sockets		Amplify Cognito		Push Notifications		Clean Code Architecture	
Provider	Bloc	Getx	Responsive UI	Debugging	Github	Postman	Calendars	RevenueCat	Stripe
Twilio	Requirement Analysis		Work breakdown structure			Play Store	App Store		

PROJECTS

Moimo

Moimo application to enhance user engagement.

- Developed the Moimo application available on the App Store.
- Designed and implemented key features focusing on user experience.

Targo

Targo application for rental services.

- Developed the Targo rental application available on the Play Store.
- Focused on responsive design and user interaction.

Gymsta

Gymsta application to manage gym memberships.

- Developed Gymsta application, facilitating gym management.
- Integrated functionality for scheduling and notifications.

Modhs Nursing Congress

Modhs Nursing Congress application.

- Developed the Modhs Nursing Congress app accessible via the App Store.
- Implemented scheduling and notification features for users.

Sha Guidelines

Sha Guidelines application.

- Designed the Sha Guidelines app available on the App Store.
- Focused on providing guidelines and information for users.

Sirs 2023

Sirs 2023 application.

- Developed Sirs 2023 application for sharing information.
- Ensured a user-friendly interface and interaction.
